I am a proficient web developer with a strong background in creating visually appealing, user-friendly, and functional websites. Over the past years, I have honed my skills in various programming languages, including HTML, CSS, JavaScript, Bootstrap, PHP, and Laravel. My experience includes translating client requirements into technical specifications and developing innovative solutions to meet their business objectives.

- **HTML & CSS:** Strong command over HTML and CSS to build responsive and aesthetically pleasing web designs.
- **JavaScript:** Expertise in JavaScript for creating interactive and dynamic user interfaces.
- **Bootstrap:** Proficient in using Bootstrap to develop mobile-first, responsive websites.

Developed Portfolios:

1. **Diana-Barills:**

   - **Overview:** Created an elegant and professional portfolio for artist Diana-Barills, showcasing her artwork and creative projects.
   - **Features:** Responsive design, dynamic gallery, project descriptions, contact form, SEO optimization.
   - **Outcome:** Enhanced online presence, increased client engagement, and streamlined portfolio management.

2. **Killian:**

   - **Overview:** Developed a modern and interactive portfolio for Killian, featuring his graphic design and multimedia projects.
   - **Features:** Custom animations, interactive elements, project showcases, client testimonials, easy navigation.
   - **Outcome:** Improved user experience, higher client inquiries, and effective project presentation.

3. **Reptartheman:**

   - **Overview:** Designed a unique and visually striking portfolio for Reptartheman, emphasizing his digital art and illustrations.
   - **Features:** High-resolution image galleries, artist blog, social media integration, user-friendly interface.
   - **Outcome:** Expanded reach to potential clients, better engagement on social media, and increased portfolio visibility.

Developed Landing Pages:

- Created effective landing pages for various clients, focusing on lead generation, brand promotion, and user engagement. These landing pages feature clear calls to action, optimized content, and responsive designs to ensure maximum conversion rates.

Developer Business Web Profiles:

- Developed professional web profiles for developers, highlighting their skills, experience, and projects. These profiles are designed to attract potential employers and clients by showcasing the developers' expertise and accomplishments in an organized and visually appealing manner.

Developed a comprehensive online portfolio for an artist, showcasing their recent and previous projects. The portfolio features a visually appealing design that highlights the artist's work and provides an intuitive user experience.

Key Features:

- **Responsive Design:** Ensured the portfolio is accessible and visually appealing on all devices.
- **Gallery Section:** Created a dynamic gallery to showcase the artist's recent and previous projects with high-quality images.
- **Project Descriptions:** Included detailed descriptions for each project, highlighting the inspiration, techniques, and outcomes.
- **Contact Form:** Implemented a contact form to facilitate communication between the artist and potential clients.

Vehicle Crud System In PHP Laravel
Freelancing

https://github.com/G4Guru/Vehicle-CRUD-System-in-Larave

Tools: VS Code, Xampp, Laravel

Vehicle CRUD System in Laravel:
This project guides you through building a basic vehicle CRUD system using Laravel. It focuses on core functionalities and paves the way for future enhancements.

Features:
- Create new vehicles with details like make, model, year, and license plate.
- View a list of all vehicles with basic details (make, model, year).
- View details of an individual vehicle.
- Edit existing vehicle information.
- Delete vehicles.

Validation:

Ensure user input adheres to specific rules (e.g., required fields, year format).

Database Storage:
Persist vehicle data in a database using Laravel.

Project Setup:
- Create a new Laravel project using Laravel's new vehicle Crud.
- Set up the database connection in the .env file.
- Migrate the database (create tables) using php artisan migrate.
